CHECKLIST: HOW TO BENEFIT FROM THE SWISS GSP

Step 1: Establish the product's tariff classification

Establish the correct tariff classification by consulting the Customs Tariff and identifying the tariff item number based on the Harmonized System (HS) of the product intended for export to Switzerland.

Step 2: Check the product coverage

Find out whether your product is eligible for preference under the Swiss GSP. To do so, consult annexes 2 and 3: Product coverage.

Step 3: Assess the preferential margin

If your product is eligible for preferential treatment under the Swiss GSP, you should assess the preferential margin to determine the price you can offer your buyer or importer.

Step 4: Comply with origin criteria

Make sure that your product complies with the rules of origin for the Swiss GSP.

Step 5: Check consignment conditions

Make sure that the consignment conditions specified are met.

Step 6: Prepare documentary evidence

The Swiss GSP requires one of the following papers as documentary evidence:

- Certificate of origin Form A;
- Replacement certificate of origin Form A endorsed by the Customs authorities of a member State of the European Union (EU), Norway or Turkey¹ on the basis of a certificate of origin, Form A issued by an approved authority in the country of origin; or
- Invoice declaration.
- When inputs originating in Switzerland are cumulated in the products concerned, a certificate EUR.1 must be issued by the Swiss Customs authorities.

Step 7: If you have questions

For questions relating to tariff classification, duties, origin requirements, customs and administrative procedures, contact the General Directorate of Swiss Customs authorities.

THE SWISS GSP SCHEME

1. Introduction

The Swiss Generalized System of Preferences (GSP) was first introduced on 1 March 1972, in compliance with Switzerland's intention to implement Resolution 21 (II) adopted by UNCTAD II in 1968.

The Swiss GSP covers all industrial goods and many agricultural products and provides preferential treatment in the form of reduction of or exemption from duty. For least developed countries (LDCs) it covers all products and provides duty-free quota-free access.

The Swiss GSP has been modified several times.² Following the conclusion of the Uruguay Round of the General Agreement on Tariffs and Trade (GATT), Switzerland undertook a thorough revision of its GSP, which had come into force on 1 March 1997 for 10 years. In particular, for LDCs, duty-free market access was granted for all industrial products, as well as an exemption from customs duties on most agricultural products. In addition, the countries that could benefit from the Swiss GSP were reconsidered. On 1 January 2002, coverage for agricultural products was further expanded for LDCs with two stages of tariff reduction on that date and 1 April 2004.

On 1 March 2007, the Swiss GSP was extended for an unlimited period through the prolongation in the form of Federal Law of 9 October 1981 on the Granting of Tariff Preferences for Developing Countries RS 632.91; and the introduction of Federal Ordinance of 16 March 2007 on Preferential Tariff Rates for Developing Countries RS 632.911. This revision introduced duty-free quota-free (DFQF) market access for products originating from LDCs, and since September 2009 all products originating from LDCs have DFQF market access. Furthermore, the countries that could benefit from the Swiss GSP were reconsidered, and tariff preferences for agricultural goods for all beneficiary countries were significantly enlarged.

On 1 May 2011, the revised Federal Ordinance on the rules of origin for the Swiss GSP entered into force, providing origin criteria identical to those of the EU's GSP for products of chapters 25-97 of the Harmonized System (HS). Finally, the list of beneficiary countries and territories was modified on 1 July 2011.

2. General principles of the Swiss GSP

The Swiss GSP is designed to help increase and diversify exports of developing countries covering a vast range of products and largely granting duty-free access. It should, however, be remembered that the Swiss market is exacting and that quality is often more important than price. Furthermore, the Swiss market is relatively small.

2.1. Product coverage and preferential tariff rates

Developing countries: The revision of the Swiss GSP in 2007 and 2009 significantly enlarged preferences on agricultural goods where largely duty-free quota-free market access applies. The industrial products are admitted duty-free with the exception of textiles and clothing, for which preferential reductions of 50 per cent of the normal rate are granted, and a few other products for which specific preferential reductions are granted.

LDCs and HIPC Countries: Switzerland grants DFQF access to all agricultural and industrial products originating from LDCs. Also, Switzerland provides, on a temporary basis, the same DFQF treatment to products originating from countries undergoing international debt relief and having not yet received full and irrevocable reduction in debt. The current criterion is the participation in the Heavily Indebted Poor Countries (HIPC) Initiative. HIPC countries are granted DFQF market access from the "pre-decision point". After reaching "completion point", the regular GSP preferences shall again apply. HIPC countries with LDC status after the "completion point" still benefit from DFQF market access due to their LDC status.

Tariff line information on product coverage and tariff reduction under the Swiss GSP is found in annexes 2 and 3.

2.2. Beneficiary countries

In principle, all developing countries are eligible for the Swiss GSP, with the exception of countries and territories that have attained a high level of development. The exclusion is based on objective criteria. GSP benefits will not be granted to countries that are members of the Organization for Economic Cooperation and Development (OECD) or that have a free trade agreement with Switzerland. Excluded are also countries and territories that the Development Assistance Committee (DAC) of the OECD has classified as a most advanced developing country or territory under Part II of its list of the development aid recipients. The definition of LDCs is used according to the United Nations Economic and Social Council. Countries benefiting from the Swiss GSP are listed in annex 1.

As of 1 September 2012, the following revisions were made in the status of countries and territories benefitting from Switzerland's GSP:³

- Inclusion of South Sudan as a new developing country
- Exclusion of countries having concluded a free-trade agreement with Switzerland through the European Free Trade Association (EFTA), i.e., Montenegro and Ukraine
- Exclusion of high income countries or territories belonging to high income economies, i.e., Barbados and Trinidad-and-Tobago
- Exclusion of Maldives from the LDC category
- Exclusion of Guinea-Bissau, Kyrgyz Republic, Liberia, the Democratic Republic of the Congo and Togo from the HIPC category.

Beneficiary countries and their country status are indicated in annex 1.

2.3. Safeguard clause

In accordance with Article 8 of Federal Ordinance of 16 March 2007 on Preferential Tariff Rates for Developing Countries, Switzerland may withdraw for a certain period the GSP preferences in respect of agricultural products falling under HS chapters 1, 2, 4 to 8, 10 to 12 and 15 to 17, in cases where there is a risk of domestic price collapse due to the reasons such as unusual import increase, stagnation of domestic demand and increase in domestic supply. For LDCs and HIPC countries, however, preferential treatment for developing countries instead of DFQF treatment will be applied during the application of the safeguard clause. The necessity of safeguard measures will be determined based on the criteria set by the Swiss government. The safeguard clause was applied on sugar (HS 1701.9999) from developing countries (excluding LDCs) from 1st September to 31st December 2007.

2.4. Importance of notification

An indispensable condition for the application of the Swiss GSP is that the government of the beneficiary country notify the Swiss authorities of the names and addresses of the authorities, who are empowered to issue and verify certificates of origin and to provide specimen impressions of stamps used by those authorities for that purpose.

Notifications shall be made to the following address:

3. Rules of origin

The Swiss GSP includes rules of origin which the products must comply with to qualify for GSP treatment. The entry into force of the revised Federal Ordinance on Rules of Origin for the Swiss Generalized System of Preferences on 1 May 2011, significantly simplified the rules of origin for the Swiss GSP and made them identical

to those of the EU for industrial products (HS chapter 25 to 97). Furthermore, LDC-specific rules of origin were introduced for many products, making GSP benefits increasingly effective for LDCs. With respect to agricultural products (HS chapters 1 to 24), the rules of origin are specific to the Swiss GSP and apply the method of tariff heading change (HS 4-digit level) with the exception of four products, i.e. HS 1108 (starches), 1901 (malt extract), 1904 (cereal products), and 1905 (bread, pastry, cakes). The origin requirements for the four agricultural products are specified in the list of working and processing required, which is contained in annex 4.

In order to qualify for preferential tariff treatment in Switzerland, products sent from a beneficiary country to Switzerland must:

- (a) Be transported directly to Switzerland from the beneficiary country;
- (b) Comply with the rules of origin laid down for those products by Switzerland; and
- (c) Be accompanied by appropriate documentary evidence as to their origin.

To satisfy the rules of origin criterion, products have to be either wholly obtained in a beneficiary country or to have undergone sufficient working or processing in that country. The detailed conditions and provisions that products must fulfil to be granted preferential treatment are set out below.

3.1. Wholly obtained products

The following are considered as wholly obtained in a beneficiary country:

- (a) Mineral products extracted from its soil or from its seabed;
- (b) Vegetable products harvested there;
- (c) Live animals born and raised there;
- (d) Products obtained from live animals there;
- (e) Products from slaughtered animals born and raised there;
- (f) Products obtained by hunting or fishing conducted there;
- (g) Products of aquaculture where the fish, crustaceans and molluscs are born and raised there;
- (h) Products of sea fishing and other products taken from the sea by vessels flying the flag of the beneficiary country or Switzerland;
- (i) Products made on board its factory ships flying the flag of the beneficiary country or Switzerland, exclusively from products referred to in point (h);
- (j) Used articles collected there fit only for the recovery of raw materials;
- (k) Waste and scrap resulting from manufacturing operations conducted there;
- (l) Products extracted from the seabed or below the seabed, which is situated outside any territorial sea but where it has exclusive exploitation rights;
- (m) Goods produced there exclusively from products specified in points (a) to (l).

3.2. Sufficient working or processing

Goods with import content must undergo sufficient working or processing prescribed in the Swiss GSP rules of origin. Annex 4 contains the list of working or processing required.

Agricultural products (HS Chapters 1-24)

For the purpose of the rules of origin, working or processing is considered to be sufficient when the goods obtained become classified under a tariff heading of the Harmonized System⁴ (HS) other than that covering each of the non-originating products used.

There are a few exceptions to this rule, i.e. HS 1108 (starches), 1901 (malt extract), 1904 (cereal products), and 1905 (bread, pastry, cakes). For these products origin requirements are specified in the list of working or processing required contained in annex 4.

Industrial products (HS Chapters 25-97)

For industrial products, the conditions set out in annex 4 must be fulfilled.

3.3. General tolerance rule

Under the general tolerance rule, non-originating materials which, according to the conditions set out in the sufficient working or processing list (annex 4), are not to be used in the manufacture of a given product may nevertheless be used, provided that their total value does not exceed 15 per cent of the ex-works price of the products. The general tolerance rule does not apply to textiles and clothing products (HS chapters 50 to 63).

When an origin determining rule in the sufficient working or processing list specifies the maximum percentage of the non-originating materials allowed, the total value of the non-originating materials used shall not exceed the percentage given.

Example of application of the general tolerance rule: A doll (classified HS 9502) will qualify if it is manufactured from any imported materials which are classified in different headings. This means a manufacturer in a beneficiary country is allowed to import raw materials, such as plastics, fabrics etc., which are classified in other headings of the HS. But the use of doll's parts (e.g. doll's eyes) is not normally possible as these are classified in the same heading (HS 9502). However, the tolerance rule allows the use of these parts if they amount to not more than 15 per cent of the doll's value.

3.4. Insufficient working or processing

The following operations and processes are considered, on their own or in combination with each other, not to be sufficient to confer origin whether or not the origin criterion was fulfilled by these operations and processes:

- (a) Preserving operations to ensure that the products remain in good condition during transport and storage;
 - (b) Breaking-up and assembly of packages;
 - (c) Washing, cleaning; removal of dust, oxide, oil, paint or other coverings;
 - (d) Ironing or pressing of textiles and textile articles;
 - (e) Simple painting and polishing operations;
 - (f) Husking and partial or total milling of rice; polishing and glazing of cereals and rice;
 - (g) Operations to colour or flavour sugar or form sugar lumps; partial or total milling of crystal sugar;
 - (h) Peeling, stoning and shelling, of fruits, nuts and vegetables;
 - (i) Sharpening, simple grinding or simple cutting;
 - (j) Sifting, screening, sorting, classifying, grading, matching (including the making-up of sets of articles);
 - (k) Simple placing in bottles, cans, flasks, bags, cases, boxes, fixing on cards or boards and all other simple packaging operations;
 - (l) Affixing or printing marks, labels, logos and other like distinguishing signs on products or their packaging;
 - (m) Simple mixing of products, whether or not of different kinds; mixing of sugar with any material;
 - (n) Simple addition of water or dilution or dehydration or denaturation of products;
 - (o) Simple assembly of parts of articles to constitute a complete article or disassembly of products into parts;
 - (p) A combination of two or more of the operations specified in points (a) to (o);
-

- (q) Slaughtering of animals.

Operations and processes shall be considered simple when neither special skills nor machines, apparatus or tools especially produced or installed for those operations are required for their performance. However, chemical reactions are not considered as simple mixing.

3.5. Definition of “customs value” and “ex-works price”

Where the list of working or processing required (annex 4) provides that goods obtained in a beneficiary country are considered as originating there only if the value of the products worked or processed does not exceed a given percentage of the value of the goods obtained, the values to be taken into consideration in determining such a percentage are :

- (a) For a product which has been used as material, the “customs value” at the time of importation. If this is not known and can not be ascertained, the earliest ascertainable price paid for it in the country or territory where manufacture takes place;
- (b) For a product which has been produced in the country concerned, the “ex-works price” of the goods obtained, minus any internal taxes which are, or may be, repaid when the product obtained is exported.

“Customs value” shall be understood to mean the customs value laid down in the 1994 Agreement on Implementation of Article VII of the General Agreement on Tariffs and Trade (WTO Agreement on Customs Valuation).

“Ex-works price” means the price paid to the manufacturer in whose plant sufficient working or processing has taken place. Where this has been carried out successively in two or more plants, the price to be taken into account is that paid to the last manufacturer, provided the price includes the value of all the products used in manufacture.

3.6. Unit of qualification for the purposes of determining origin

Each article in a consignment is considered separately. For the purpose of this rule:

- (a) Where the HS specifies that a set of articles is to be classified under a single heading, such a set is treated as one article; sets as defined in General Interpretative Rule 3 of the HS are regarded as originating when all component articles are originating products. Nevertheless, when a set is composed of originating and non-originating products, the set as a whole is regarded as originating provided that the value of the non-originating articles does not exceed 15 per cent of the total value of the set;
- (b) Tools, parts and accessories which are imported with a piece of equipment, machine, apparatus or vehicle, and the price of which is included in that of the piece of equipment, etc., or for which no separate charge is made, are considered as forming a whole with the piece of equipment, etc., provided that they constitute the standard equipment normally included in the sale of an article of that kind.

Where, under General Interpretative Rule 5 of the HS, packaging is included with the product for classification purposes, it shall be included for the purposes of determining origin.

3.7. Neutral elements

To determine where a product originates, it is not necessary to consider the origin of the following inputs used in manufacturing:

- (a) Energy and fuel;
- (b) Facilities and equipment;
- (c) Machinery and tools;
- (d) Other goods which are not or are not supposed to be part of the final product.
-

3.8. Temporary derogations for LDCs

A temporary derogation from the rules of origin may be granted for LDCs, when so justified due to the reasons such as development of existing industries or creation of new industries. For this purpose, the LDC concerned shall submit to the Swiss Government a request for derogation together with the fullest possible information justifying the request. The following, in particular, shall be taken into account when the request is considered:

- (a) Cases where the application of existing rules of origin would significantly affect the ability of an existing industry in the LDC concerned to continue its exports to Switzerland, in particular in cases where this could lead to cessation of these activities;
- (b) Specific cases where it can be clearly demonstrated that significant investments in an industry could be deterred by application of the rules of origin; and
- (c) The economic and social impact of the decision to be taken, especially in respect of employment.

In order to facilitate consideration of the request for derogation, the country making the request shall furnish the fullest possible information on the points listed below in support of its request:

- (a) Description of the finished product;
- (b) Nature and quantity of the materials originating in third countries;
- (c) Manufacturing process;
- (d) Value added;
- (e) Number of employees in the company concerned;
- (f) Anticipated volume of exports to Switzerland;
- (g) Other possible sources of supply for raw materials; and
- (h) Reasons for the duration requested.

The same rules apply to any justifiable request for an extension of derogation.

As of September 2011, no LDCs have temporary derogations of origin requirements.

3.9. Cumulation of origin

Cumulation means that in determining the origin of a product originating inputs in the countries which are designated for cumulation can be considered as originating in a beneficiary country.

A. Cumulation with Switzerland: donor country content

Cumulation with the donor country (Switzerland) offers the possibility to use Swiss-originating inputs and to consider them as originating in a GSP beneficiary country for the determination of origin. The aim of the donor country content, which was introduced on 1 July 1996, is to increase industrial cooperation between firms in Switzerland and in the beneficiary countries.

Products originating in Switzerland are considered as originating in a beneficiary country provided that the working or processing carried out there goes beyond the minimal or insufficient processes described above. Products are considered as originating in Switzerland if they were obtained entirely in Switzerland or underwent sufficient working or processing discussed in 3 (b) above.

Example of donor country content

A Brazilian manufacturer of electrical toy trains (HS 9503) exports its products to Switzerland. The Swiss GSP rule of origin for this product is "Manufacture from materials of any heading, except that of the product" or "Manufacture in which the value of all the materials used does not exceed 70 per cent of the ex-works price of the product"⁵

Inputs used for manufacturing the electrical toy trains (HS9503) (Percentage)

Frame (HS 9503) originating in Malaysia	10%
Axles (HS 9503) originating in China	15%
Motor (HS 8501) originating in Chile	30%
Paint (HS 3176) originating in Switzerland	10%
Locomotive (HS 9503) originating in China	10%
Cars, other parts (HS 9503) originating in Brazil	10%
Labour originating in Brazil	10%
Profit originating in Brazil	5%
<hr/>	
Ex-works price	100%

Determination of origin

The Brazilian manufacturer cannot use the criterion “Manufacture from materials of any heading, except that of the product”, as the inputs include those of HS 9503, and it exceeds the general tolerance level of 15 per cent (Section 3.3). Thus, to meet the other origin requirements, non-originating inputs must not exceed 70 per cent. Although the Brazilian originating content is 25 per cent, because of the provision allowing cumulation with donor country content, paint originating in Switzerland can be cumulated as Brazilian content. The toy trains, therefore, meet the origin requirements as the non-originating inputs represent 65 per cent of the ex-works price.

Administrative procedure required

The Swiss inputs must carry a proof of origin from the Swiss exporter, and they must be transported directly between Switzerland and Brazil. The accepted proof of origin for the Swiss inputs is a EUR.1 certificate or an invoice declaration (annex 5). For information on documentary requirements, see Section 4 below.

B. Cumulation with the EU, Norway or Turkey (concerning Turkey please refer to endnote 1)

The GSP beneficiary countries can cumulate originating materials from the EU, Norway or Turkey for the determination of origin when they are further processed or incorporated into a product in that beneficiary country. This cumulation is limited to industrial products of HS Chapters 25-97, and it aims at facilitating the cooperation among enterprises in the beneficiary countries and the EU, Norway, Switzerland and Turkey. Cumulation with the EU, Norway or Turkey is possible only when originating materials from these trading partners are transported directly between them and the beneficiary countries.

Example of cumulation with the EU, Norway or Turkey (concerning Turkey please refer to endnote 1)

The Brazilian manufacturer of the electrical toy trains (HS 9503) changed the supplier of the paint from Switzerland to Norway due to the cost advantage and the cumulation possibility. Also, the supplier of axles was changed from China to Turkey to take advantage of the cumulation possibility.

Inputs used for manufacturing the electrical toy trains (HS9503) (Percentage)

Frame (HS9503) originating in Malaysia	10%
Axles (HS9503) originating in Turkey	15%
Motor (HS8501) originating in Chile.....	30%
Paint (HS3176) originating in Norway	8%
Locomotive (HS9503) originating in China	10%
Cars, other parts (HS9503) originating in Brazil	10%
Labour originating in Brazil.....	10%
Profit originating in Brazil.....	7%
<hr/>	
Ex-works price	100%

Determination of origin

In this case, the Brazilian originating content is 50 per cent because the axles and paint can be counted as Brazilian originating due to the cumulation possibility with Norway and Turkey. The toy trains, therefore, meet the origin requirements.

Administrative procedure required

The inputs from Switzerland, Norway, EU and Turkey must fulfil the GSP rules of origin and must be transported directly from these countries. Export documentation to Brazil must include a proof of origin from the exporters in Switzerland, Norway, the EU and Turkey. For more information on documentary requirements, see Section 4.

C. Regional cumulation

Materials originating in one country of the regional group which are further worked or processed in another beneficiary country of the same group are considered to originate in the latter country, provided that:

- (a) The value added there is greater than the highest customs value of the materials used originating in any one of the other countries of the regional group; and
- (b) The working or processing carried out there is more than “insufficient working or processing” noted in 3.(d).

Products of chapters 50 to 63 and HS 6401 to 6405 are excluded from regional cumulation.

Regional groups wishing to apply the provisions of regional cumulation should make a request to the Swiss government.

At present, only the Association of Southeast Asian Nations (ASEAN) has requested and been granted the right to make use of the cumulation treatment set out above.⁶ Switzerland grants regional cumulation only to the following ASEAN States: Cambodia, Indonesia, Laos, Malaysia, Myanmar, the Philippines, Thailand and Vietnam. This means that Switzerland does not grant GSP preferential treatment in the following cases:

- a Certificate of Origin Form A or GSP Invoice declaration was issued in Brunei Darussalam or in Singapore;
- a Certificate of Origin Form A or GSP Invoice declaration bears the origin indication “Brunei-Darussalam” or “Singapore”; or
- a subsequent verification of a Certificate of origin Form A or a GSP Invoice declaration issued in one of the above mentioned eight ASEAN States has revealed that materials or products of “Brunei-Darussalam” or “Singapore” origin were used in the manufacture of the product exported to Switzerland. However, this applies only in cases where the material or product of “Brunei-Darussalam” or “Singapore” origin was crucial for the fulfilment of the origin criterion applied to the exported product.

3.10. Direct consignment

To ensure that the GSP benefits are granted only to goods originating in the beneficiary countries, Switzerland applies a direct consignment rule. Consequently, the Swiss GSP is applicable only for goods that are transported directly from the beneficiary country to Switzerland. Transit of goods through other countries, however, is allowed if certain conditions are met. The following shall be considered as transported directly from the beneficiary country to Switzerland:

- (a) Products transported from the beneficiary country to Switzerland without passing through the territory of any other country, except in the case of the territory of the same regional group indicated in 3.i.(c);
- (b) Products whose transport from the beneficiary country to Switzerland has involved transit through the territory of one or more countries, with or without transshipment or temporary storage in such countries. This is provided that the transport of the goods through third countries is justified for geographical reasons or exclusively on account of transport requirements, that the goods remain under customs control in these countries, and have not undergone any operation there other than unloading and loading or any operation required to keep them in good condition;

- (c) Products originally consigned from a beneficiary country to a member country of the EU, Norway or Turkey (concerning Turkey, please refer to endnote 1) and then re-exported to Switzerland from that EU country, Norway or Turkey are likewise regarded as transported directly to Switzerland from the beneficiary country, provided that they have remained under customs control in the EU, Norway or Turkey and have not undergone operations other than those referred to in subparagraph (b) above;
- (d) Products transported through the pipeline in other countries.

As a proof that the conditions set out in subparagraphs (b) and (c) above are met, the documents required include:

- (1) A single transport document covering the passage from the exporting country through the country of transit; or
- (2) A certificate issued by the Customs authorities of the country of transit:
 - (i) Giving an exact description of the products;
 - (ii) Stating the dates of unloading and reloading of the products, and the names of the ships or the other means of transport used; and
 - (iii) Certifying the conditions under which the products have remained in the country of transit; or
- (3) Any other documents that confirm that the conditions set out in subparagraphs (b) and (c) above have been met. AQ

4. Documentary evidence of origin

The importers' claim for GSP treatment has to be supported by documentary evidence of origin. Products originating in a beneficiary country shall benefit from the GSP benefits on submission of:

- (a) A certificate of origin Form A; or
- (b) A replacement certificate of origin Form A issued by the Customs authorities of an EU State, Norway or Turkey (concerning Turkey please refer to endnote 1) based on a Form A, endorsed by a competent authority in the country of origin; or
- (c) An invoice declaration.

When materials of Swiss origin are to be cumulated in a beneficiary country according to point 3.9.A. they must be imported into the beneficiary country covered by either a movement certificate EUR.1 (annex 5) issued by the Swiss Customs authorities or an invoice declaration made out by the exporter (annex 5).

4.1. Certificate of origin Form A

The claim for GSP treatment must be supported by the submission of a certificate of origin, Form A (annex 5) endorsed by a competent authority in the country of origin. It shall be issued in English or French. If it is completed by hand, entries must be in ink and in capital letters. Each certificate shall measure 210 x 297 mm. The paper used shall be white writing paper, sized, not containing mechanical pulp. It shall have a printed green guilloche-pattern background making any falsification by mechanical or chemical means apparent to the eye. Each certificate shall bear a serial number by which it can be identified. It is the responsibility of the relevant authority of the exporting beneficiary country to ensure that the application form is duly completed.

If cumulation with Switzerland (Section 3.9A), the EU, Norway, or Turkey (concerning Turkey please refer to endnote 1) (Section 3.9 B) has taken place, the following text must be included in Box 4 of Form A respectively: "CUMUL SUISSE" or "SWISS CUMULATION", "CUMUL UE" or "EU CUMULATION", "CUMUL NORVÈGE" or "NORWAY CUMULATION", or "CUMUL TURQUIE" or "TURKEY CUMULATION".

The certificate shall be endorsed by the competent authority of the beneficiary country if the products to be exported originate in that country; when cumulation with Switzerland, the EU, Norway or Turkey (concerning Turkey please refer to endnote 1) has taken place, the endorsement must be done on the basis of a EUR.1 certificate (annex 5) or invoice declaration (annex 5) referring to the cumulated materials.

A certificate of origin must be submitted to the Swiss Customs authorities within 10 months of its date of issue by the competent authority. The Customs authorities may, however, accept a certificate after its expiration date, if the delay is caused by reasons beyond control or due to exceptional circumstances. Also, the Customs authorities may do so when the products have been presented to them before the expiry of the time limit.

A certificate of origin Form A may exceptionally be issued after exportation of the products to which it relates, if it was not issued at the time of exportation because of errors or involuntary omissions or special circumstances. The duplicate issues should be marked "DELIVRÉ A POSTERIORI" or "ISSUED RETROSPECTIVELY" in box 4 of Form A.

4.2. Replacement of certificates

The Swiss Customs authorities accept certificates of origin Form A endorsed by the Customs authorities of an EU member State, Norway or Turkey (concerning Turkey please refer to endnote 1) on the basis of a certificate of origin Form A issued by the competent authorities of the exporting beneficiary country, provided that the goods have been transported to Switzerland as provided for in Section 3.10 above.

The Swiss Customs authorities may endorse a replacement certificate of origin Form A on the basis of a certificate of origin, Form A, issued by the competent authorities of an exporting beneficiary country when goods are re-exported into an EU member State, Norway or Turkey, provided that the goods have remained under customs control in Switzerland and that the conditions of Section 3.10 above have otherwise been complied with.

In cases referred to in the above two paragraphs the Swiss Customs authorities may, upon request, send a copy of the certificate of origin issued in the exporting beneficiary country to the relevant Customs authorities in the country of destination for their use.

4.3. Invoice declaration

For the purpose of cumulation of materials originating in Switzerland, an approved exporter in Switzerland, who is authorized by the Swiss custom authorities can make out an invoice declaration disregarding the value of the consignment.

Any other exporter (in Switzerland or the beneficiary country) may make out an invoice declaration for a consignment if the total value of the originating products does not exceed CHF 10,300 (ex-works price).

The invoice declaration as set out in annex 5 is a written origin statement from the exporter on the invoice and needs not be endorsed by any authority. It must be made out in English or French and signed by the exporter. In case of issue by an approved exporter in Switzerland as noted above, the exporter's signature is not required.

If cumulation with Switzerland (Section 3.9 A), the EU, Norway or Turkey (Section 3.9 B) (concerning Turkey please refer to endnote 1) has taken place, the following text must be included in the invoice declaration respectively: "CUMUL SUISSE" or "SWISS CUMULATION", "CUMUL UE" or "EU CUMULATION", "CUMUL NORVÈGE" or "NORWAY CUMULATION", or "CUMUL TURQUIE" or "TURKEY CUMULATION".

If the exporter of the products concerned is requested by the Customs authorities of Switzerland or of the exporting country, the exporter must submit all the documents necessary to prove the authenticity of the origin of the products.

4.4. Exemptions from proof of origin for small packages

A consignment of originating products which is sent from a beneficiary country as a small package from private person to private person for personal use is granted exemption from customs duties without documentary

evidence of origin being required, provided that its importation is occasional and not for any commercial purpose and on condition that the value of the consignment does not exceed CHF 900.

5. Administrative cooperation in case of doubt on the authenticity of a certificate of origin Form A or invoice declaration

The correctness of certificates of origin Form A or invoice declarations may be subject to verification at any time, either at random or whenever there is a reason to doubt the authenticity or the accuracy of the information regarding the origin of the goods in question. For this purpose, the Swiss Customs authorities may return the certificate of origin Form A or the invoice declaration to the relevant authorities of the exporting beneficiary country.

Where verification has been requested, it shall be carried out and the results shall be communicated to the Swiss Customs authorities within six months. These results must be such as to make it possible to determine whether the certificate of origin Form A or the invoice declaration corresponds to the goods actually exported, and whether these goods in fact qualify for the application of GSP treatment.

If there is no reply within six months of the date of the verification request, the Swiss Customs authorities would send to the relevant authority of the exporting beneficiary country a second request.

If there is no reply within four months of the date of the second request, or if the reply does not contain sufficient information to determine the authenticity of the document in question or the real origin of the products, the preference treatment will be denied.

The exporter must keep the copies of Form A, EUR.1, invoice declaration and the proofs of the origin for at least three years.

⁴ The Harmonized System is a classification system for goods comprising 21 sections, 96 chapters and over 1,200 headings (4-digit level). Some headings are subdivided into subheadings (6-digit level) which are further subdivided into two-dash subheadings (8-digit level). The Harmonized System includes over 5,000 separate categories of classification of goods. It is implemented by the International Convention on the Harmonized Commodity Description and Coding System of 14 June 1983. It is now employed in the customs tariffs and trade statistical nomenclature of over 120 countries.

⁵ For products of ex chapter 95 the exporter may choose between two origin criteria: either the above mentioned change of the 4-digit tariff heading or the 70% value criterion (please see Annex 4, “ex chapter 95”).

⁶ Singapore and Brunei Darussalam are excluded.

Annex 4

LIST OF WORKING OR PROCESSING REQUIRED TO BE CARRIED OUT ON NON-ORIGINATING MATERIALS IN ORDER THAT THE PRODUCT MANUFACTURED CAN OBTAIN ORIGINATING STATUS

Introductory notes

Note 1

- 1.1. This Annex sets out rules for all products, but the fact that a product is included in it does not mean that it is necessarily covered by the scheme of generalised tariff preferences (GSP) of Switzerland.
- 1.2. This Annex lays down the conditions pursuant to Article 6 of Federal Ordinance of 30 March 2011 on Rules of Origin for the Swiss Generalized System of Preferences (RS 946.39). There are four different types of rules, which vary according to the product:
 - (a) through a maximum content of non-originating materials allowed in a obtained product;
 - (b) through working or processing the 4-digit Harmonized System (HS) headings or 6-digit HS sub-headings of the manufactured products becomes different from the 4-digit HS headings or 6-digit sub-headings respectively of the materials used;
 - (c) a specific working and processing operation is carried out;
 - (d) working or processing is carried out on certain wholly obtained materials.

Note 2

- 2.1. The first two columns in the list describe the product obtained. The first column gives the HS heading number or chapter number used in the HS and the second column gives the description of goods used in that system for that HS heading or chapter. For each entry in the first two columns one or more rules ("qualifying operations") are set out in column 3. These qualifying operations concern only non-originating materials. Where, in some cases, the entry in column 1 is preceded by "ex", this signifies that the rule in column 3 applies only to the part of that HS heading as described in column 2.
- 2.2. Where several HS heading numbers are grouped together in column 1 or a chapter number is given and the description of products in column 2 is therefore given in general terms, the adjacent rule in column 3 applies to all products which, under the HS, are classified in HS headings of the chapter or in any of the HS headings grouped together in column 1.
- 2.3. Where there are different rules in the list applying to different products within a HS heading, each indent contains the description of that part of the HS heading covered by the adjacent rule in column 3.
- 2.4. Where two alternative rules are set out in column 3, separated by "or", it is at the choice of the exporter which one to use.
- 2.5. For some products less stringent rules shall apply for products originating in LDCs. In these cases, column 3 is split into two sub-columns, (a) and (b), with sub-column (a) showing the rule applicable to LDCs and sub-column (b) showing the rule applicable to all other beneficiary countries.

Note 3

- 3.1. Article 6, concerning products having acquired originating status which are used in the manufacture of other products, shall apply, regardless of whether this status has been acquired inside the factory where these products are used or in another factory in the beneficiary country or in Switzerland.
-

Example: An engine of HS heading 8407, for which the rule states that the value of the non-originating materials which may be incorporated may not exceed 50 per cent of the ex-works price (70 per cent for a LDC), is made from “other alloy steel roughly shaped by forging” of HS heading ex 7224.

If this forging has been forged in a beneficiary country concerned or in Switzerland from a non-originating ingot, it has already acquired originating status by virtue of the rule for HS heading ex 7224 in the list. The forging can then count as originating in the value calculation for the engine regardless of whether it was produced in the same factory or in another factory in the beneficiary country concerned. The value of the non-originating ingot is thus not taken into account when adding up the value of the non-originating materials used.

- 3.2. The rules in the list represent the minimum amount of working or processing required, and the carrying-out of more working or processing also confers originating status; conversely, the carrying-out of less working or processing cannot confer originating status. Thus, if a rule provides that non-originating material, at a certain level of manufacture, may be used, the use of such material at an earlier stage of manufacture is allowed, and the use of such material at a later stage is not.
- 3.3. Without prejudice to Note 3.2, where a rule uses the expression “Manufacture from materials of any HS heading”, then materials of any HS heading(s) (even materials of the same description and HS heading as the product) may be used, subject, however, to any specific limitations which may also be contained in the rule. However, the expression “Manufacture from materials of any HS heading, including other materials of HS heading ...” or “Manufacture from materials of any HS heading, including other materials of the same HS heading as the product” means that materials of any HS heading(s) may be used, except those of the same description as the product as given in column 2 of the list.
- 3.4. When a rule in the list specifies that a product may be manufactured from more than one material, this means that one or more materials may be used. It does not require that all be used.

Example: The rule for fabrics of HS headings 5208 to 5212 provides that natural fibres may be used and that chemical materials, among other materials, may also be used. This does not mean that both have to be used; it is possible to use one or the other or both.

- 3.5. Where a rule in the list specifies that a product must be manufactured from a particular material, the rule does not prevent the use also of other materials which, because of their inherent nature, cannot satisfy this condition. (See also Note 6.2 below in relation to textiles). However, this does not apply to products which, although they cannot be manufactured from the particular material specified in the list, can be produced from a material of the same nature at an earlier stage of manufacture.

Note 4

- 4.1. The term “natural fibres” is used in the list to refer to fibres other than artificial or synthetic fibres. It is restricted to the stages before spinning takes place, including waste, and, unless otherwise specified, includes fibres that have been carded, combed or otherwise processed but not spun.
- 4.2. The term “natural fibres” includes horsehair of HS heading 0503, silk of HS headings 5002 and 5003 as well as the wool fibres, fine or coarse animal hair of HS headings 5101 to 5105, the cotton fibres of HS headings 5201 to 5203 and the other vegetable fibres of HS headings 5301 to 5305.
- 4.3. The terms “textile pulp”, “chemical materials” and “paper-making materials” are used in the list to describe the materials not classified in HS chapters 50 to 63, which can be used to manufacture artificial, synthetic or paper fibres or yarns.
- 4.4. The term “man-made staple fibres” is used in the list to refer to synthetic or artificial filament tow, staple fibres or waste, of HS headings 5501 to 5507.
-

Note 5

- 5.1. Where for a given product in the list a reference is made to this note, the conditions set out in column 3 shall not be applied to any basic textile materials, used in the manufacture of this product, which, taken together, represent 10 per cent or less of the total weight of all the basic textile materials used. (See also Notes 5.3 and 5.4 below).
- 5.2. However, the tolerance mentioned in Note 5.1 may only be applied to mixed products which have been made from two or more basic textile materials.

The following are the basic textile materials:

- silk,
- wool,
- coarse animal hair,
- fine animal hair,
- horsehair,
- cotton,
- paper-making materials and paper,
- flax,
- true hemp,

- artificial man-made staple fibres of viscose,
- other artificial man-made staple fibres,
- yarn made of polyurethane segmented with flexible segments of polyether whether or not gimped,
- yarn made of polyurethane segmented with flexible segments of polyester whether or not gimped,
- products of HS heading 5605 (metallized yarn) incorporating strip consisting of a core of aluminium foil or of a core of plastic film whether or not coated with aluminium powder, of a width not exceeding 5 mm, sandwiched by means of a transparent or coloured adhesive between two layers of plastic film,
- other products of HS heading 5605,
- glass fibres,
- metallic fibres.

Example: A yarn of HS heading 5205 made from cotton fibres of HS heading 5203 and synthetic staple fibres of HS heading 5506 is a mixed yarn. Therefore, non-originating synthetic staple fibres that do not satisfy the origin rules (which require manufacture from chemical materials or textile pulp) may be used up to a weight of 10 per cent of the yarn.

Example: A woollen fabric of HS heading 5112 made from woollen yarn of HS heading 5107 and synthetic yarn of staple fibres of HS heading 5509 is a mixed fabric. Therefore synthetic yarn which does not satisfy

the origin rules (which require manufacture from chemical materials or textile pulp) or woollen yarn that does not satisfy the origin rules (which require manufacture from natural fibres, not carded or combed or otherwise prepared for spinning) or a combination of the two may be used provided their total weight does not exceed 10 per cent of the weight of the fabric.

Example: Tufted textile fabric of HS heading 5802 made from cotton yarn of HS heading 5205 and cotton fabric of HS heading 5210 is only a mixed product if the cotton fabric is itself a mixed fabric being made from yarns classified in two separate HS headings or if the cotton yarns used are themselves mixtures.

Example: If the tufted textile fabric concerned had been made from cotton yarn of HS heading 5205 and synthetic fabric of HS heading 5407, then, obviously, the yarns used are two separate basic textile materials and the tufted textile fabric is accordingly a mixed product.

5.3. In the case of products incorporating “yarn made of polyurethane segmented with flexible segments of polyether whether or not gimped” this tolerance is 20 per cent in respect of this yarn.

5.4. In the case of products incorporating “strip consisting of a core of aluminium foil or of a core of plastic film whether or not coated with aluminium powder, of a width not exceeding 5 mm, sandwiched by means of an adhesive between two films of plastic film”, this tolerance is 30 per cent in respect of this strip.

Note 6

6.1. In the case of those textile products which are marked in the list by a footnote referring to this note, textile materials, with the exception of linings and interlinings, which do not satisfy the rule set out in the list in column 3 for the made-up product concerned may be used provided that they are classified in a HS heading other than that of the product and that their value does not exceed 8 per cent of the ex-works price of the product.

6.2. Without prejudice to Note 6.3, materials which are not classified within HS chapters 50 to 63 may be used freely in the manufacture of textile products, whether or not they contain textiles.

Example: If a rule in the list provides that for a particular textile item, such as trousers, yarn must be used, this does not prevent the use of metal items, such as buttons, because buttons are not classified within HS chapters 50 to 63. For the same reason, it does not prevent the use of slide-fasteners even though slide-fasteners normally contain textiles.

6.3. Where a percentage rule applies, the value of materials which are not classified within HS chapters 50 to 63 must be taken into account when calculating the value of the non-originating materials incorporated.

Note 7

7.1. For the purposes of HS headings 2707 and 2713, the “specific processes” are the following:

- (a) vacuum distillation;
 - (b) redistillation by a very thorough fractionation process;
 - (c) cracking;
 - (d) reforming;
 - (e) extraction by means of selective solvents;
 - (f) the process comprising all the following operations: processing with concentrated sulphuric acid, oleum or sulphuric anhydride; neutralization with alkaline agents; decolorization and purification with naturally active earth, activated earth, activated charcoal or bauxite;
 - (g) polymerization;
 - (h) alkylation;
 - (i) isomerization.
-

7.2. For the purposes of HS headings 2710 to 2712, the “specific processes” are the following:

- (a) vacuum distillation;
- (b) redistillation by a very thorough fractionation process;
- (c) cracking;
- (d) reforming;
- (e) extraction by means of selective solvents;
- (f) the process comprising all the following operations: processing with concentrated sulphuric acid, oleum or sulphuric anhydride; neutralization with alkaline agents; decolorization and purification with naturally active earth, activated earth, activated charcoal or bauxite;
- (g) polymerization;
- (h) alkylation;
- (ij) isomerization;
- (k) in respect of heavy oils falling within HS heading ex 2710 only, desulphurization with hydrogen resulting in a reduction of at least 85 per cent of the sulphur content of the products processed (ASTM D 1266-59 T method);
- (l) in respect of products falling within HS heading 2710 only, deparaffining by a process other than filtering;
- (m) in respect of heavy oils falling within HS heading ex 2710 only, treatment with hydrogen at a pressure of more than 20 bars and a temperature of more than 250°C with the use of a catalyst, other than to effect desulphurization, when the hydrogen constitutes an active element in a chemical reaction. The further treatment with hydrogen of lubricating oils of HS heading ex 2710 (e.g. hydrofinishing or decolorization) in order, more especially, to improve colour or stability shall not, however, be deemed to be a specific process;
- (n) in respect of fuel oils falling within HS heading ex 2710 only, atmospheric distillation, on condition that less than 30 per cent of these products distils, by volume, including losses, at 300°C by the ASTM D 86 method;
- (o) in respect of heavy oils other than gas oils and fuel oils falling within HS heading ex 2710 only, treatment by means of a high-frequency electrical brush-discharge;
- (p) in respect of crude products (other than petroleum jelly, ozokerite, lignite wax or peat wax, paraffin wax containing by weight less than 0,75 % of oil) of HS heading ex 2712 only, de-oiling by fractional crystallisation.

7.3. For the purposes of HS headings ex 2707 to 2713, simple operations such as cleaning, decanting, desalting, water separation, filtering, colouring, marking, obtaining a sulphur content as a result of mixing products with different sulphur contents, any combination of these operations or like operations do not confer origin.

- (c) comply with the consignment conditions specified by the country of destination. In general, products must be consigned direct from the country of exportation to the country of destination but most preference-giving countries accept passage through intermediate countries subject to certain conditions. (For Australia, direct consignment is not necessary).

III. Entries to be made in Box 8

Preference products must either be wholly obtained in accordance with the rules of the country of destination or sufficiently worked or processed to fulfil the requirements of that country's origin rules.

- (a) Products wholly obtained: for export to all countries listed in Section I, enter the letter "P" in Box 8 (for Australia and New Zealand Box 8 may be left blank).
- (b) Products sufficiently worked or processed: for export to the countries specified below, the entry in Box 8 should be as follows:
 - (1) United States of America: for single country shipments, enter the letter "Y" in Box 8, for shipments from recognized associations of counties, enter the letter "Z", followed by the sum of the cost or value of the domestic materials and the direct cost of processing, expressed as a percentage of the ex-factory price of the exported products; (example "Y" 35% or "Z" 35%).

 - (5) Australia and New Zealand: completion of Box 8 is not required. It is sufficient that a declaration be properly made in Box 12.

* For Australia, the main requirement is the exporter's declaration on the normal commercial invoice. Form A, accompanied by the normal commercial invoice, is an acceptable alternative, but official certification is not required.

** Official certification is not required.

*** The Principality of Liechtenstein forms, pursuant to the Treaty of 29 March 1923, a customs union with Switzerland.

 - Fédération de Russie: pour les produits avec valeur ajoutée dans le pays exportateur bénéficiaire de préférences, il y a lieu d'inscrire la lettre "Y" dans la case 8, en la faisant suivre de la valeur des matières et des composants importés, exprimée en pourcentage du prix fob des marchandises exportées (exemple: "Y" 45%); pour les produits obtenus dans un pays bénéficiaire de préférences et ouverts ou transformés dans un ou plusieurs autres pays bénéficiaires, il y a lieu d'inscrire les lettres "Pk" dans la case 8;

** Un visa officiel n'est pas exigé.

*** Les Etats-Unis n'exigent pas de certificat SGP Formule A. Une déclaration reprenant toute information appropriée et détaillée concernant la production ou la fabrication de la marchandise est considérée comme suffisante, et doit être présentée uniquement à la demande du receveur des douanes du district (District collector of Customs).

- 2) Fra gli articoli indicati nel certificato non devono essere lasciate linee in bianco ed ogni articolo deve essere preceduto da un numero d'ordine. Immediatamente dopo l'ultima trascrizione deve essere tracciata una linea orizzontale. Gli spazi non utilizzati devono essere sbarrati in modo da rendere impossibile ogni ulteriore aggiunta.
